

DAKAR

Basket stretcher with wheels

Dakar is a basket stretcher intended for recovery of patients when other devices would be difficult to use. Typical uses are recovery by ground hoisting with the stretcher in horizontal position, ground transfers, recoveries and transfers that require rapid intervention and side impact protection.

Specific features

- The single shell body makes it extremely safe and easy to handle
- Aluminum frame with telescopic handles increases safety during lifting operations and make them easier
- Equipped with eyelets for the attachment of snap hooks
- Perimetral rope to fix belts or accessories
- Wheels of large diameter on the front side of the stretcher to allow short ground displacements
- Mattress to increase patient comfort
- Footrest to improve patient's longitudinal containment
