Tapered vacuum mattress

Vacuum mattresses are devices for the immobilization of trauma patients. The vacuum system allows different levels of immobilization. The more rigid helps the right positioning of the patient; softer ones allow to mitigate the low-frequency vibrations typically found on emergency vehicles during transport.

Specific characteristics

Robust, non absorbent and self-extinguishing fabric
 Perimetral rope with soft handles for easy transport
 Tapered shape to improve adherence to the patient
 9 carrying handles make it easier to transport and allow better adaptation in various rescue scenarios
