

LX CUT

Our newly developed glass saw **LX CUT** is part of the new **LUKAS LX GLASS** as well as available separately. The LX CUT convinces by handiness, robust design and outstanding cutting performance when cutting laminated safety glass.

By the way, from now on our new LUKAS accessory series is called **LUKAS LX** plus the short name of the respective product. Thereby "**LX**" stands for **LUKAS EXTRA**. The revised equipment now has a fresher look, is selected in high quality, has a clear design language and uniform naming.
