Wildland Firefighting Suit Jacket + Pants

2 layer

Fire-retardant wildland firefighting suit (pants and jacket) made with a lining layer for high protection against direct attack, friction and optimal breathability.

Thermal insulation

Made of 65% Lenzing® F.R., 30% Nomex®, 5% Kevlar® for perfect insulation against radiation and high temperatures. High neck with overlap and fire-retardant Velcro® close for proper neck and nape protection. Central closure with a fire-retardant open-end zipper. Made of highly-resistant Nomex®.

Resistance

Seams resistant to friction and wear inherent to a wildland setting. Adjustable wrists with fire-retardant Velcro®. Four front pockets with pull-straps to be easily opened when wearing gloves, one adapted for portable radios. Velcro® for identification on the chest. Attachment ring for radio holster at shoulder height.

Standards

EN 15614:2007	Minimum requirements for wildland fire fighting protective clothing.
EN ISO 13688:2013	Protective garments. General requirements.
EN ISO 11612:2015	Protective clothing against heat and flame.
EN 1149-5:2019	Protective clothing. Electrostatic properties. Material behavioral requirements and design.
EN ISO 15384:2020	Minimum requirements for wildland fire fighting protective clothing.
