Alaska Fire Swatter

Maximum performance for direct attack

This all-new fire swatter concept exceeds today's limitations giving priority to ergonomics and efficiency.

The flapper is designed so the parts can rotate to adapt better to the ground and penetrate more into the bush.

More efficiency, less physical wear

The innovative design makes physical work more efficient. How? The flexible handle causes a whip effect for greater flapper speed with less effort, thereby increasing performance and user comfort. Greater operability due to the adjustable 45° attack angle.

A telescopic handle that is adaptable to any situation and user

A telescopic handle with an adaptable length for use and transport at different heights.

The arm that joins the handle to the flapper is made of Pom Delrin C - Polyoxymethylene (Copolymer) is flexible to accumulate more power for the subsequent impact, helps reduce the effort of the movement. Plus, the flexibility absorbs the impact to prevent overloading on the user's hands and arms.

Flexible handle with whip effect

Absorption of the impact on the ground.

Technical specifications

Weight	1.78 kg
Rigid handle material	Aluminum
Flexible handle material	Pom Delrin C - Polyoxymethylene (Copolymer)
Flapper composition	Tear-resistant multilayer cotton and self-extinguishing synthetic rubber.
Flap work surface	30 x 21 cm
Length when folded	92 cm
Length when extended	2 m

1 Flapper and head

The flapper is designed for:

- Suffocation and drag (made easier with the vertical parts).
- Rotary parts to work in bushes.
- Vertical parts for easier dragging.

A fold-down head with folding and 45° angle lock system so the flapper remains attached to the handle to occupy minimal space.

Fold-down head

2 Telescopic handle

The telescopic handle reduces the size by up to 92 cm when folded for transport and can be extended up to 2 m for adaptation to the firefighter's height and the various work situations (bushes or open land).

Folded (92 cm)

Extended (2 m)

3 Cover

A small cover for easier and flexible carrying. Features an adaptable strap for hanging so hands may be free to work with other tools all while carrying the fire swatter over the back.
