

(F5)

STORM FORCE 5

Available to buy separate.
The V3 Flexi Light Sticks have a simple press-to-operate button under the coloured marker, which activates the 4 modes.

Our Storm Force 5 Rescue Suit is the latest tri-laminate drysuit that evolved originally from our popular Storm Surface Drysuit. We've made the suit thicker and therefore more hard-wearing since our Storm Force 4 editions (the Red/Navy, Red and Yellow versions).

Using our expertise and years of experience in the design and manufacturing of drysuits, plus our long standing experience working with emergency response teams we have created a drysuit with all of the key features you would require when conducting an on the water rescue at an affordable price!

This a robust, heavy duty drysuit designed for disaster relief, ideal for rescue and emergency response teams conducting any type of marine based rescue whether it be a swift water rescue in a flooding situation or an offshore rescue in the most extreme of conditions.

Other uses can include:

Water rescue, coastguard, sea search and rescue, flood response, river rescue, boating operations, sailing, kayaking, paddle boarding, canoeing, jet and water skiing, land yachting, power boating, fishing - all activities underwater and on the water!

Suit features:

Fabric build:
375D heavy duty tri-laminate
Front entry BDM metal dry zip (medium duty)
Yamamoto neoprene neck/wrist seals
Reflective strips on the cuff and legs
1x Flexi-Light stick arm pocket (left)
1x bellows pocket Velcro closure (right)
Double layer knee/seat protection
Elasticated ankle gaitors
Latex socks

Available in sizes :

S, M, ML, L, XL, XXL, XXXL
